

Hi, I'm Arifuzzaman

I develop 3D visuals, user interfaces and web applications

Overview.

I'm an innovative web developer specializing in front-end development. With a passion for creating engaging websites and a knack for seamless user experiences, I bring a versatile skill set to the table. I also have a strong command over Arduino project code, enabling me to combine web development with exciting hardware programming. I am committed to continuous learning and collaboration, always striving to bring innovative ideas to life. Let's discuss your project in detail and turn your ideas into reality!

Web Developer

React Native Developer

Full-Stack Developer

Arduino Programmer

WHAT I HAVE DONE SO FAR

Work Experience.

Arduino Programmer

Facebook Marketplace

- Demonstrated expertise in designing and implementing projects using Arduino microcontrollers.
- Showcased proficiency in integrating various components such as sensors, LEDs, buzzers, and motors into Arduino-based systems.
- Exhibited a keen interest in incorporating Bluetooth communication for enabling notifications and mobile device control.
- Continuously sought opportunities for learning and skill development to enhance my programming capabilities within the Arduino ecosystem.

March 2019 - May 2020

and software integration.

- Committed to continuous learning and staying up-to-date with the latest trends and technologies in the field of web development.

Jun 2023 - Present

React Native Developer

Upwork

- Skilled React Native developer with expertise in building cross-platform mobile applications for both iOS and Android platforms.
- Proficient in developing interactive and user-friendly interfaces using React Native components and libraries.
- Experienced in integrating APIs and third-party services, ensuring seamless functionality and data flow in mobile applications.
- Committed to delivering high-performance and scalable React Native applications, focusing on code quality and best practices.

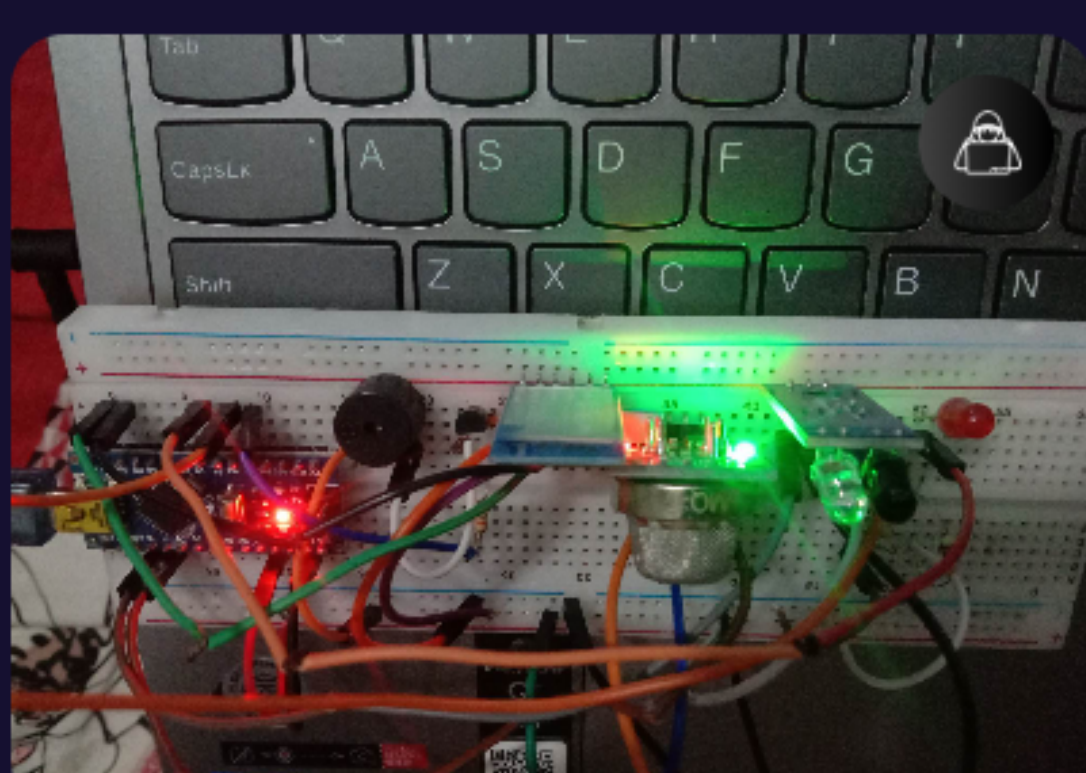

MY WORK

Projects.

Following projects showcases my skills and experience through real-world examples of my work. Each project is briefly described with links to code repositories and live demos in it. It reflects my ability to solve complex problems, work with different technologies, and manage projects effectively.

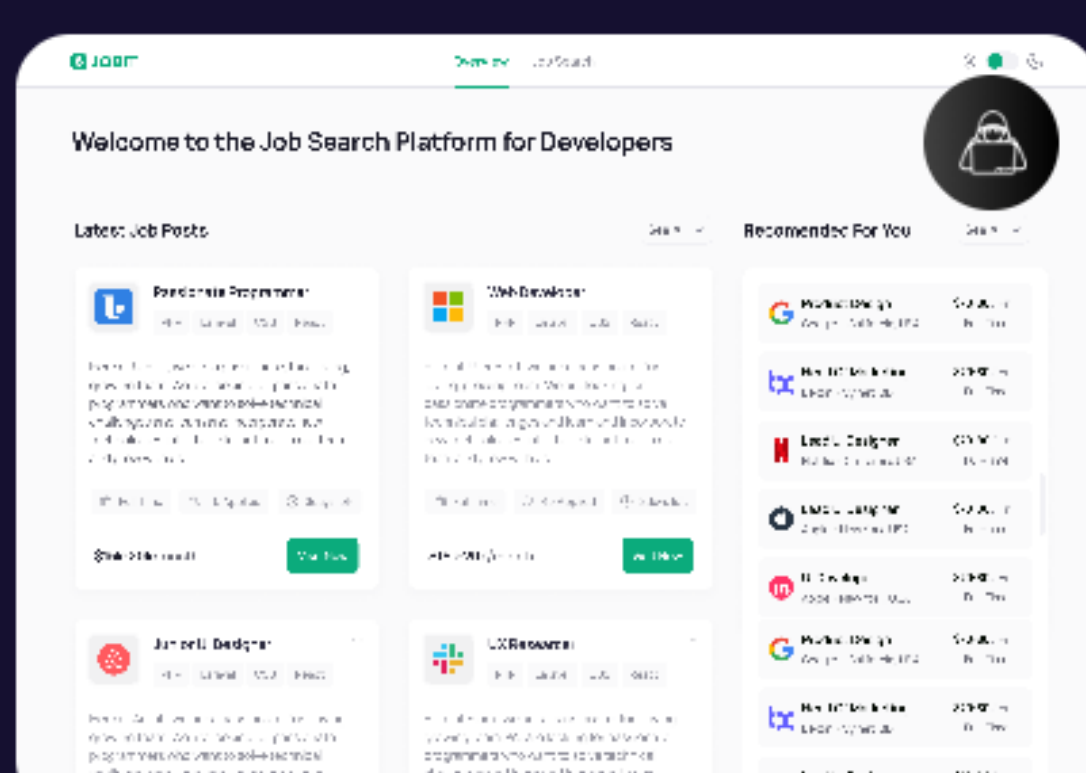

problems, work with different technologies, and manage projects effectively.

Smart Fire Notifier

Ingenious Arduino project for fire and smoke detection, utilizing sensors, LEDs, and Bluetooth communication for seamless notification.

Job IT

Web application that enables users to search for job openings, view estimated salary ranges for positions, and locate available jobs based on their current location.

#react #reactjs #css

Trip Guide

A comprehensive travel booking platform that allows users to book flights, hotels, and rental cars, and offers curated recommendations for popular destinations.

#nextjs #supabase #css

WHAT OTHERS SAY

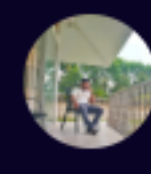

Testimonials.

“

Brilliant Arduino project demonstrating innovative problem-solving and remarkable hardware integration.

@ Shaklahi Ahmed

CFO of ASSET

“

I've never met a web developer who truly cares about their clients' success like Rick does.

@ Chris Brown

COO of DEF Corp

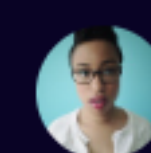

“

After Rick optimized our website, our traffic increased by 50%. We can't thank them enough!

@ Lisa Wang

CTO of 456 Enterprises
